Who we are:

- We are Americans. We are your neighbor, your doctor, your mechanic. We are your child's teacher, the veteran, the store manager. We are your brothers, your sisters, your uncles or your cousins. We are the ones that have not forgotten our history and what once made us the greatest and most respected nation on the earth. We here at the Project are honorable law abiding citizens who care deeply about our America.
- We can carry forward knowledge and understanding not to be used as aggression but to safe guard. We strive to further the Survival of our Family, Country, Heritage and Values, of which is the American way regardless of crises and whether it be man made or natural.
- Our membership is diverse and from all walks of life. Its all about being an American and believing in the principles our founding fathers
- We emphasize the basic fundamentals of what we once knew in sustaining under the most serious conditions and most of all we exist as a network to assure **no one person or family stands alone when the crisis happens.**

 - A Political Movement
 - A Prep Rally
 - Survivalists
 - Paramilitary
 - Doom Sayers

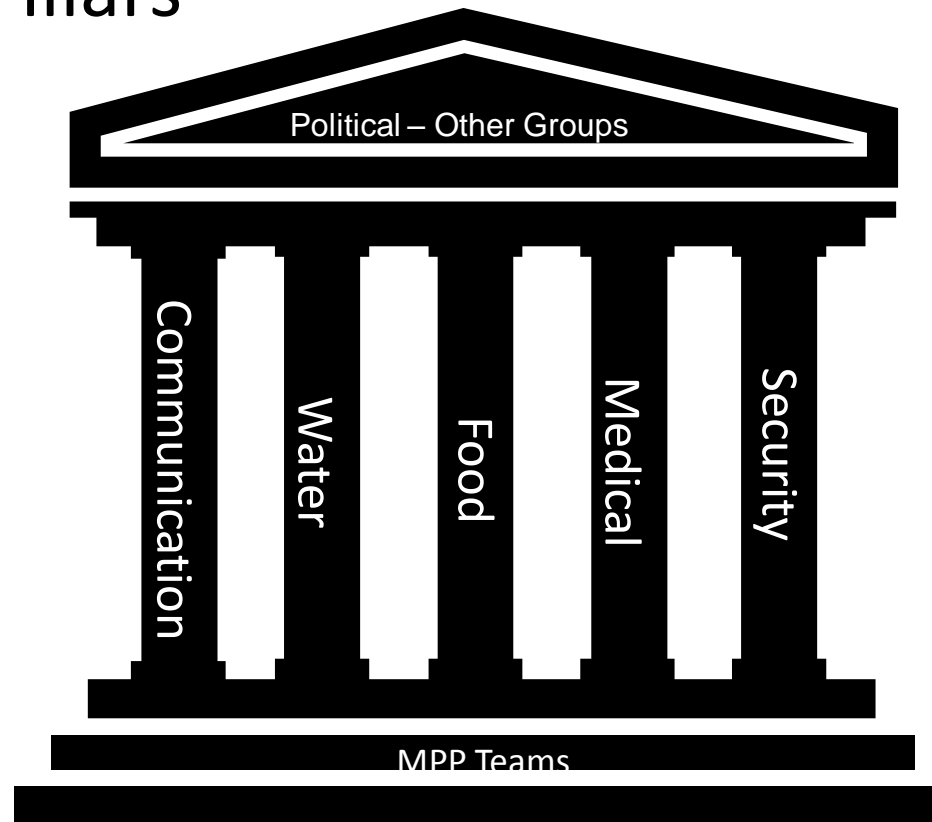

- Where we are located – MPP
 - Has Six regions within the state of Mississippi
 - Each Region has a Point of Contact or POC and sub camps in each region
 - The MPP has a council consisting of all POC's, their seconds and the State POC for Alarm and Muster

- The Five Pillars

- First, lets put this into perspective:
 - We MUST have a way to communicate if normal lines of communication are unavailable
 - We MUST have a source or be able to create a source of water.
 - We MUST have the means to find or stockpile eatable food
 - We MUST have the knowledge and availability of Medical needs outside of the norm.
 - We MUST have the means and knowledge to conduct viable security as a person and as a **TEAM** when called upon.
 - We MUST sustain as a **TEAM** and by example continue the founding fathers intent and communicate its importance.

- Why?

Civil Unrest – Societal Breakdown

Natural Disasters

- LIE TO ME – the most imminent reason

Body language cue –
Geitner is touching his head
or face when answering a
question from a
congressional hearing in
regards to the status of
the Federal Reserve and
the status of the economy.

Summary – He is lying
through his teeth

- What are the triggers the MPP and A&M are looking at:
 - Dubai is bankrupt, and this news has sent a shockwave through markets around the world. But why? Why would Dubai's bankruptcy affect U.S. markets?
 - The U.S Debt – by the end of the year it will be %62 of the GDP.
 - The U.S. is 16 TRILLION IN DEBT and they are printing more
 - China's , Russia and India 's quiet gold buying habits which have increased it reserves by 75% or more since 2003:
 - Japan and China are getting ready to dump treasury bonds (Debt). The U.S. Dollar will collapse. The U.N. has already called for the replacement of the Dollar
 - "Official" unemployment has soared to 10.2% while REAL unemployment according to the U-6 measurement is around 18%. (Detroit is at %50 plus)
 - Over 226 banks across the country have been closed in 2009 and 2010 so far with over 700 at risk.
 - The FDIC has announced that it has officially run out of funds, and is now in the red for \$8.2 billion (2009, Double that now)

Gerald Celente, Neither Press and other reputable analysts have stated or predicted for at least the past two years that the primary collapse of the U.S. economy would occur in 2010 or 2011.

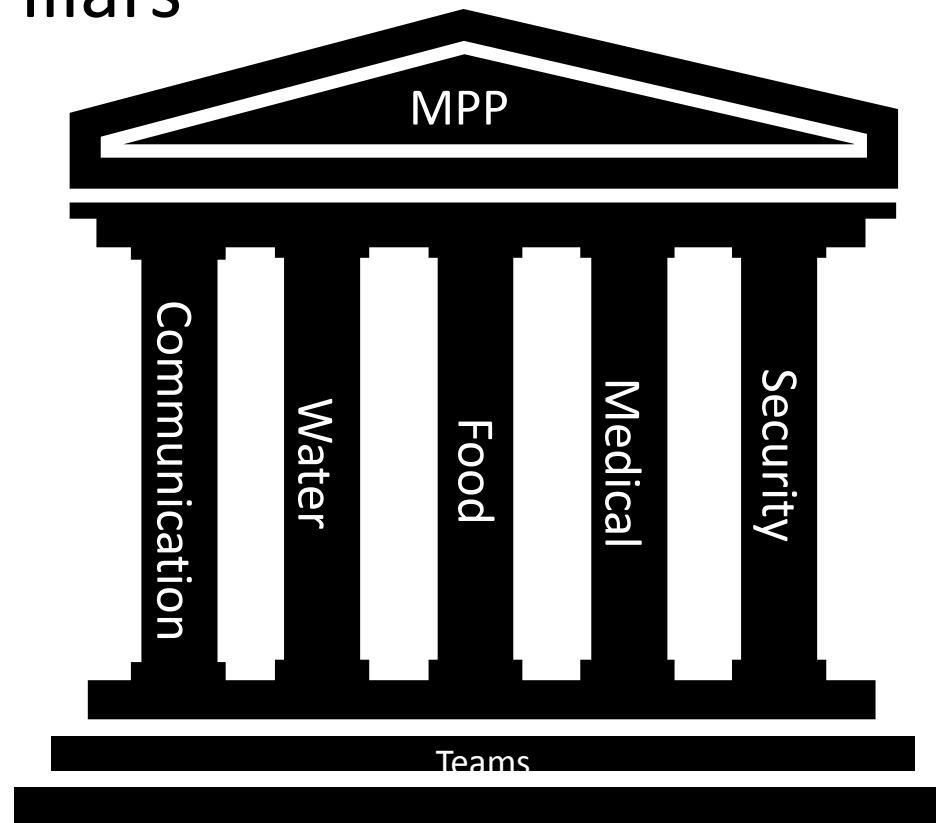

- What are the triggers the MPP and A&M are looking at:
 - The continued assaults:
 - Nationalization of all financial institutions
 - Nationalization of Private business.
 - Nationalization of all Health care
 - The intentional Hobbling of:
 - Energy production – Gulf Oil Spill, refusal to allow drilling permits
 - Security – Jon Kyle “Obama will not secure the boarder without amnesty
 - Destruction of this Nations Sovereignty
 - U.N Treaties
 - IMF Treaty or agreements
